## QUOTATION

1 x Aabspec #CXS Advanced Ultra-Low Volume Catalyst System, (ambient to 600degC) with special sample arrangements for a catalyst wafer with modified sample probe and special inserts as discussed. Cell formed in 316 grade stainless steel (no welds or brazes). Gas Inlet and Outlet ports with Swagelok fittings. Stainless steel sheathed Read-Out Thermocouple (Type K, Chromel-Alumel). External surfaces cooled by water circulation. Supplied with a spectrometer specific adjustable mounting system. Fully demountable external optical windows (KBr). Special internal KBr windows and sample location insert. Power supply stabilized 230/240V. Electrical connection for #STP-6 (as described below). Power rating 400W. Supplied with User Manual and any special tools required. The unit is User Installable.

€45,990.00

1 x Aabspec #STP-6, Software based Temperature Programmer. Menu driven. All metal electrically grounded instrument housing. Eight programs with multi-ramp, multi-dwell, can be stored. Time proportional control across a one second sampling interval. Switching at zero-crossover. So-called "fail-safe" circuitry. Sensing via Type K Thermocouple (Chromel-Alumel). Supplied with User Manual and and any special tools required. The unit is User Installable.

€11,780.00

Spares Pack Comprising:

2 x Spare External KBr windows + 2 x Spare Internal KBr Windows  
+ 2 x Sample Support Inserts + External Window Seals (2 sets)
