## Short Bio

Lucia Rampino  
Born: Milan, Italy,  
January 13, 1973

Lucia Rampino is an architect and **PhD in Industrial Design**. Her core field of research is **product design**, with a focus on theories of design and the nature of design processes, in particular as they pertain to product innovation. Her recent attention has concentrated on the opportunities that **dynamic artefacts** offer for creating engaging user experience aimed at behavior change. She has published widely on these topics, in both Italian and English. Rampino has taken part in 16 national and European co-financed research projects. Moreover, she has participated in various privately financed research activities.

She is on the Design PhD faculty of Politecnico di Milano since 2009. On March 2018 she has been appointed as the PhD Program vice-coordinator.

Since 2010, she has been regularly blind-reviewing for International Conferences and refereed Design Journals.

In 2015, she was the main chair of the DeSForM International Conference on "Aesthetics of Interaction: Dynamic. Multisensory. Wise."
